

BOUNDARY OF IDENTIFIED RESERVE BASE COAL -
 Drawn along the 5-foot (1.5-m) coal isopach (I), the KRCRA boundary (K), and the 3000-foot (914-m) overburden study limit (B). Arrow points toward area of identified Reserve Base coal.

RB	R (50%)	
0.38	0.19	(Measured resources)
0.09	0.05	(Indicated resources)

IDENTIFIED COAL RESOURCES OF THE FRUITLAND 2
COAL BED - Showing totals for Reserve Base
(RB) and Reserves (R), in millions of short
tons, for each section or part(s) of
section of Federal coal land outside the
stripping-limit line. Dash indicates no
resources in that category. Reserve Base
(RB) x the Recovery Factor (50 percent) =
Reserves (R).

BOUNDARY LINES - Enclosing areas of measured (M), indicated (Ind), and inferred (Inf) coal resources. Dashed where projected from adjacent quadrangles.

To convert short tons to metric tons, multiply short tons by 0.9072.

To convert miles to kilometers, multiply
miles by 1.609.

Values given for subsurface Reserve (R) tonnages represent 50% of the calculated Reserve Base (RB) values. Calculated Reserve Base and Reserve values have been rounded off to the nearest 10,000 tons of coal.

Reserve Base and Reserve values of 0.00 represent resources of less than 5,000 tons of coal.
